25X1

The Marzahn (N 53/Z 95) - Karow (N 53/Z 96) section of the Outer Freight Ring northeast of Berlin was opened on 30 March 1950.

Comment:

Progress of work on this project was previously reported\*. Report is confirmed by the slow-down regulations of the Berlin railroad district for the period between 9 and 22 April 1950. Completion of the remaining Karow - Lasdorf - Oranienburg sections is being expedited.

The Berlin Outer Freight Ring is single-tracked and has comparatively crude switching installations. Maximum train density on the line is estimated at 52 trains in both directions within 24 hours.
